

TECHNICAL SPECIFICATION
ASSEMBLY INSTRUCTIONS
Company: "IMPRESSIA 99" LTD
Fence, colorful model

I. TECHNICAL SPECIFICATION

1. General characteristic

Fence made of metal construction and wooden elements. They are intended for stationary placement to the existing terrain by installing with concrete steps or anchoring. The attachment of all wooden details to the metal part is by screws for metal with a wide periphery in order to prevent vandalism.

2. Overall dimensions of the fence

Length – from 140 to 200 cm

Height - from 40 to 120 cm

Warranty period – 24 months

3. Materials used

For the production of the fence, selected and dried coniferous wood with the necessary profiles of 125/25 mm was used. All details are sanded, impregnated and double-lacquered with varnishes for outdoor use. Assemblies are made using galvanized, metal, threaded fittings. All other metal parts and elements of the facility are made of hollow profile 30/30 mm, 25/25 mm and 20/20 mm, protected against the action of atmospheric influences with primer and paint for external use.

II. INSTALLATION OF THE FACILITY

The installation of the facility to the existing terrain is carried out by anchoring in a concrete foundation. The connection of the structure of the facility and the concrete foundation is made through metal heels and bolted connections to the structure.
